

## **Diffusion**

### **Requirements**

No required CBL or other equipment.

In this module we study probabilistic models of diffusion using both simulation and Markov Chains.

Be sure to send your instructor email in the usual format.

---

### **Questions**

1. Describe the results of your experimentation with the Java applet for diffusion in the five-celled organism.
2. Describe the results of your own experimentation with the six-celled organism in the last question in the module.
