Most of the important information as well as the schedule is on the website, so please review it carefully.

Throughout the semester I will give more than 10 in-class quizzes (based heavily on the suggested exercises) and occasional take-home worksheets during the semester. The section grade (50 points out of 500 total) will be comprised of the 10 highest scores on quizzes and worksheets, the rest will be dropped. There will be no make-up quizzes, and late worksheets will receive no credit.

While I will not take attendance, success is closely correlated to attendance, and it is expected that you show up for all classes. If you miss a class, it is your responsibility to catch up with the material and possible announcements.

The website has a list of suggested homework. Mathematics is no spectator sport, so doing as many of these as you can is the best way to succeed in this class. Whenever you hit a roadblock, please use all available resources for help, such as your fellow students (group work is strongly encouraged!), the Math Learning Center and my office hours.

All your grades and all important announcements will be posted on D2L.
