Stats 401: Midterm Exam 1 Correction Instructions

You have the opportunity to turn in midterm exam corrections, where corrections can earn up to half of the points back on the exam. For example, if you missed 2 points on one part of one problem, corrections for this part can earn up to 1 point, which will be added back to your exam grade.

Read the following instructions carefully. Correction credit will only be awarded if these instructions are followed.

1. Write your exam corrections on a separate sheet of paper. Do not write on the original exam.

2. Turn in your original exam with the corrections.

3. Corrections must include an explanation of why the original answer was incorrect in addition to the corrected answer. I expect that you may discuss the exam with other students, and work through certain portions of the exam together in a way that is conducive to learning for all students involved. Thus, an exam correction that only states the correct answer without any explanation or reflection on why the original answer was incorrect will result in no credit for the correction.

4. Midterm exam corrections are due at the beginning of class on Tuesday, October 31. No late submissions will be accepted.

If you do not understand why you missed points, I am happy to help you. However, I won’t work through the problem with you. I will only try to guide you in the right direction so you can come to understand your mistakes on your own.

Solutions to the midterm exam 1 will be released after corrections are due. The decision of whether to curve midterm exam 1 grades will be made after corrections are graded.
