Instructor: Rob Malo  
Office: Wilson 2-245

Class: MF 2:10-3:00 GH 243, TR 15:05-1555 ROBH 307

Text: Jon Rogawski, *Calculus: Early Transcendentals* (2nd ed)

Web Page: http://www.math.montana.edu/~malo/  
This web page will be updated soon to include this syllabus, the schedule, homework assignment, homework solutions, and anything else that seems appropriate.

Office Hours: M 3:10-4:00, TR 2:05-2:55, or by appointment.

Math Learning Center: I am in the Learning Center on Monday 6:00-9:00.

---

Exams (500 pts): There will be three 50-minute exams (100pts each) and a cumulative final exam (200 pts). The exam dates are given on the schedule on the reverse. You will not be allowed to use calculators for exams. If you are unable to be at an exam at the scheduled time, it is your responsibility to contact me ahead of time. If you need special arrangements regarding exams, please talk to me as soon as possible.

Quizzes (160 pts): There will be four 30-minute quizzes (40pts each). In all other ways, quizzes are treated the same as exams, see above.

Homework (140 pts): There will be seven collected homework exercises. I will hand out the assignment on the Monday of the week it is due. When you hand in your homework I expect the following:

- Homework will be handed in at the beginning of class on the date due. Homework handed in after the beginning of class, but before the following class, will receive at most 50%. Homework will not be accepted after the following class meeting.
- Homework will be presented in a neat and organized manner. In particular, problems should be in the correct order and stapled together with the cover sheet.

I encourage you to make use of technology to assist you in your homework. However, I expect to see all appropriate work written out on your solutions. You may work in groups or get assistance from me or the Math Learning Center; if you are having trouble I strongly encourage it. However, what you write on your solutions needs to be your work reflecting your understanding of the material.

Suggested Homework: There will be suggested homework posted to my webpage. It will not be collected, nor graded; however it will be very beneficial for you to do.

Grading: There will be 800 points possible in this course. Letter grades will be determined as follows:  
A 93%, A- 90%, B+ 87%, B 83%, B- 80%, C+ 77%, etc.

---

Math is not a spectator sport! While coming to class and taking notes, reading the text and submitting the required homework is a minimum expectation, if you hope to develop an appreciation and command of this material you will need to take an active role.
